

Commercial Displays

Description

Event Banqueting Displays

Illuminated Surrounds

Sephra have not only endeavored to create the highest quality, best performing chocolate fountains, we also create the highest quality, most functional accessories to compliment any of our commercial chocolate fountains. Sephra has taken time to study all of our products in order to make them the very best they can possibly be.

Our illuminated surrounds, for example, are made from heavy-duty food grade polypropylene. Unlike cheaper alternatives this material will not crack easily on impact.

As well as this Polypropylene is welded instead of glued – this gives your illuminated surround more strength and flexibility. Perhaps most importantly though this is a food grade material unlike the most common alternative. Perspex. It is simple variations like these that set Sephra product apart from our competitors.

Our surrounds all use a colour changing light emitting diode (LED) system. These can be remote controlled giving you the ability to change colour shade, speed and pattern depending on the event.

Our illuminated surrounds include soft carry cases made from heavy weight fabric with reinforced corners. These make your illuminated surround easier to carry, with added protection whilst in storage or transit, as well as

creating a professional appearance.

Although they are included with our surrounds, they are also available to buy separately.

Fruit Displays

Sephra manufacture a variety of displays that are perfect to use in order to enhance the appearance of your chocolate fountain, or as an individual centre piece.

You can creatively decorate your fruit display for your event and allow your guests to enjoy it as they please. You can use any fresh fruit that you wish, or even marshmallows, waffles or donuts. Use your imagination to make your display as creative and exciting as you can.

Fountain Topper

Add something special to your Sephra 34 / 44 / 54â€™ commercial chocolate fountain. Our toppers allow you to creatively and professionally decorate your fountain with flowers, figurines or any object. Magnetic objects can also be used on the topper â€” the possibilities are endless.
