Sephra are proud to announce our commercial range of popcorn machines just got better. Ideal for medium commercial and domestic use, the Sephra 8oz Popcorn maker produces popcorn every 3-4 minutes, whilst keeping the popped popcorn warm on the heater deck.

This perfect design allows your customers to be continuously served warm delicious popcorn. The popcorn maker includes a matching cart, however it can also be used without this as a table top popper. With a newly improved gear box and motor, we can assure you that this commercial machine will serve you for many years.

The Sephra 8oz Popcorn Machines has a removable tray that collects the un-popped kernels. This feature reduces waste, and is also ideal for cleaning. It also come with free accessories – a stainless steel scoop, salt shaker and measuring spoons.

As well as having a set of professional popcorn makers, Sephra also provide a range of popcorn supplies and accessories, these include popcorn boxes, kernels, oils and flavourings.
